DETAILED ACTION

Election/Restrictions

1. Please note that the *following* election of species has been made **in lieu of** the restriction of 3/14/07 as the groupings should have been further divided and so the election has been vacated. Therefore, Applicant's response of 4/13/07 is moot. Please see replacement Election of species which is as follows.
2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Testing a pump by:

- 1) causing a reduction in clearance by speed variances;
- 2) causing a reduction in clearance by coolant flow rate monitoring;
- 3) causing a reduction in clearance by increasing a flow rate;
- 4) inputting signals to an algorithm;
- 5) monitoring the motor current; or
- 6) specific signal analysis.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

- 1) claims 3-6, 35
- 2) claims 7, 34
- 3) claims 8, 10-14, 33, 36-39
- 4) claims 21, 22, 23, 26, 27, 28
- 5) claims 9 and 32
- 6) claims 18-20

The following claim(s) are generic: 1, 2, 15-17, 24, 25, 31, 40 and 41.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: testing a condition of a pump by causing a reduction in clearance by varying the speed is not the same as and is not equivalent to causing a reduction in clearance by controlling the rate of flow of coolant which is not the same as and is not equivalent to causing a reduction in clearance by increasing gas flow through a pump which is not the same as and is not equivalent to inputting

signals to an algorithm which is not the same as and is not equivalent to monitoring the motor current which is not the same as and is not equivalent to specific signal analysis.

5. A telephone call was made to Ira Zebrak on May 7, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nashmiya S. Fayyaz whose telephone number is 571-272-2192. The examiner can normally be reached on Mondays and Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on 571-272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
